

Enterprise AI systems leader. The judgment call I'm known for is the action dial: deciding where humans act, where systems act, and earning trust to keep moving it rightward. I architect the full stack so the chain holds: trusted data feeds workflow, workflow triggers agents, eval earns the right to act, AI-native enablement scales the org. Built for real revenue, real customers, real consequences. \$500M monthly revenue, 150+ products, 100+ data scientists enabled.

EXPERIENCE

SALESFORCE

San Francisco, CA
2024-Present

Product Management – Enterprise AI & Data Systems

Manage 5 scrum teams across 30+ workstreams spanning product vision, roadmapping, implementation, launch, and enablement. Hire, coach, and mentor PMs, ML engineers, data scientists, data engineers, and designers.

- **AGENTS · GTM (Sales + CS).** Ship 0 to 1 agentic GTM system embedded in Slack: AEs and CSMs ask "how is my customer, who/what/when to sell", agent reasons over the product signals SSOT, routes across RAG, structured lookup, and ML lookalike. 600+ users, 4,000+ agent tool calls in weeks with skeptical, quota-carrying field orgs.
- **EVAL · Production AI Reliability.** Architect the eval system production agents ship against: golden-prompt + golden-answer datasets graded in parallel by human and LLM-as-judge across sequencing, repetition, robustness, and conversation length, lifting accuracy +88%. Closes the loop on Slack feedback and retention signals into the next training cadence.
- **DATA · SSOT & Data Platform.** Architect the data platform across Salesforce's portfolio, 150+ consumption + 11 license products, unifying SSOT (usage, billing, revenue), aligning customer-facing Digital Wallet with field teams. Ship Product Scorecard on top as ELT QBR standard, 10x MAU/6mo. Semantic medallion layers ground 30+ SSOT use cases, every report, AI agent, and GTM motion reads from it.
- **MONETIZATION · Usage-based Transformation.** Architect the monetization platform behind Salesforce's pivot from subscription to AI Data usage-based biz model. Author the Flex Credit framework powering ~\$500M monthly revenue across pre-paid, pre-commit, and pay-go billing models, with agent-level usage tags turning AI consumption from cost-center anxiety into seller-led upsell motion.
- **WORKFLOW · Customer Journey Platform.** Architect the platform every Salesforce product plugs into for a unified 6-stage journey, collapsing 21+ fragmented funnel definitions into one canonical system with threshold-breach automation and PMM self-serve compressing cohort builds 4+ hours to under 10 minutes. Pilot surfaced 914 opportunities and \$56M eligible pipeline across 227 accounts.
- **AI-NATIVE · Agentic Analytics for 100+ DS.** Operationalize AI workflows across the data science org: Cursor playbook with MCP servers, Claude Skills, and prompt templates for Plan-mode analysis, plus a Slack-embedded Text-to-SQL agent. 10-candidate query scoring lifts efficacy 50% → 80%, with user-confirmed execution for bounded autonomy. 100+ data scientists onboarded.

Senior Manager, Product Management – ML & Data Science

2021-2024

- Owned **Search, Recommendation, and ML model platform** across Salesforce's \$1B app marketplace. Built two-sided discovery for customers (which apps to install) and partners (which customers to target) on Neural collaborative filtering and XGBoost + SHAP. +9% website conversion, 5x outbound lift.
- Architected NAS 2.0, a **modular ML customer adoption-scoring framework** evaluating customer, app, and ISV success. 3-component peer-normalized scoring (Engagement / Usage Volume / Usage Quality), boosting campaign conversion +20% and optimizing customer success interventions.

Senior Product Manager – ML & Data Science

2019-2021

- Built the **App Marketplace Graph**, the entity model unifying 26K+ apps, 3.7K partners, 250K customers, and 2.1M installs, raising install visibility coverage to 99.5%. The foundation that gave the partner ecosystem end-to-end visibility into what partners owned and what customers used.
- Shipped **Order Reconciliation**, a 2-tier risk-flagging system reconciling partner-reported orders against in-product app installations and usage telemetry, giving partner account managers a structured audit dashboard and recovering \$30M+ in unreported revenue (13% of annual ISV target) across 18K+ accounts.

ZENDESK

San Francisco, CA
2018-2019

Product Manager – Go-to-Market Strategy & Analytics

- Designed Zendesk's partner **lead-to-cash** process, implementing across 10+ systems and 15+ functional teams to enable 600+ channel partners and drive 60%+ YoY channel sales growth.
- Defined growth targets and key metrics across **sales productivity, discounting discipline, service attachment, and enterprise expansion**, driving +48% upmarket expansion and +40% total bookings growth.
- Designed the **channel coverage strategy** across reseller, referral, and BPO programs, the routing logic Zendesk's channel motion ran on.

THE WORLD FUEL SERVICES

Miami, FL; Houston, TX
2015-2017

Manager, Marketing Strategy & Analytics

- Led product strategy and market segmentation for aviation credit cards, rebranding and redefining the value proposition for a \$300M revenue potential product portfolio.
- Managed the marketing analytics team, integrating sales, market, and product data to create a global airport landscape, identifying 700+ sites for additional cross-selling opportunities and revenue expansion.

IBM

Taiwan
2010-2013

Senior Management Consultant

- Spearheaded client engagement, aligning 13 business units across four regions to design an annual business planning mechanism for a global tech company, linking vision, strategy, and budget to accelerate growth.
- Led a global product development program for a top software company, managing five workstreams across multiple regions and establishing six new product teams, projected to sustain 5–10% annual growth.

Early Career Highlights

- **Strategic Marketing Manager, SAP** Walldorf, Germany (2009–2010)
Showcased SAP solutions to 850,000+ high-tech expo visitors, driving market awareness and product adoption.
- **Sales Representative, NXP** India, Singapore, HK, Japan (2006–2008)
Awarded "Best Employee" as NXP's youngest sales representative, delivering top performance across key markets.

EDUCATION

THE UNIVERSITY OF CHICAGO BOOTH SCHOOL OF BUSINESS

Chicago, IL
2013-2015

MBA, Concentrations in Strategic Management, Economics, and Analytics

- Awarded two-year Merit-based Scholarship
- GMAT: 750 (98th percentile); Dean's Honor List

TILBURG UNIVERSITY | TURKU UNIVERSITY | UNIVERSITÉ AIX-MARSEILLE III

Netherlands, Finland and France
2008-2010

Master of Information Technology Management

- Erasmus Mundus Scholarship (acceptance rate 5%)
- L'Oréal Estrat Business Challenge 2009 Runner-up among 15,000 teams

NATIONAL TAIWAN UNIVERSITY

Taipei, Taiwan
2002-2006

Bachelor of Information Science, Minor in Psychology

- Dean's List, 2005; ranked 1st in class; GPA: 3.84/4.0
- Awarded Taiwan Merit Scholarship

ADDITIONAL SKILLS & INTERESTS

TECHNICAL SKILLS

Python, SQL, Git,
Tableau, AWS, Snowflake,
Cursor, Claude Code,
Lovable, AI Prototyping

AI/AGENT SKILLS

Agentic workflows, multi-agent architecture,
agent tool-use, MCP, RAG, multi-turn
evaluation, agent observability, LLM routing,
semantic layer, knowledge graph, vector
retrieval, structured + unstructured data

PERSONAL

Amateur singer, backing vocalist in
Booth 59th St. Band; Piano duet partner
with my son
Traveled 50+ countries; Off-the-beaten-
path slow traveler with my family
